LIQUIDITY RISK MANAGEMENT PROGRAM

Rule 22e-4, or the “Liquidity Rule,” under the Investment Company Act of 1940 requires a mutual fund to adopt a liquidity risk management program (“Program”), and disclose information about the operation and effectiveness of its Program in its reports to shareholders.

Under the Program, each of the Fund’s portfolio investments are classified into one of four liquidity categories defined by the SEC: highly liquid, moderately liquid, less liquid, and illiquid. Liquidity classifications take into account a variety of market, trading, and investment factors, including the Fund’s reasonably anticipated trade size, and the Program Administrator has engaged a third-party vendor to assist with the classification of portfolio investments.

In accordance with the Liquidity Rule, the Program Administrator prepared, and the Fund’s Board of Trustees reviewed, a report regarding the operation and effectiveness of the Program for the period ended November 30, 2023. During the period, there were no liquidity events that materially impacted the Fund’s ability to timely meet redemptions without significantly diluting remaining investors’ interests. The report concluded that the Program remains reasonably designed to assess and manage the Fund’s liquidity risk, and that during the period the Program was implemented effectively.
